LAB RECORD

2026

Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

- AWS stands for Amazon Web Services.
- It is a cloud computing platform.
- It provides services like storage, databases, networking and computing.
- AWS allows users to create and manage cloud resources.
- The Free Tier helps beginners and students learn AWS services.
- An AWS account is created using an email ID, password and personal details.
- After creating the account, users can access the AWS Management Console.
- MFA can be enabled to secure the AWS account.

Steps to Create an AWS Account

STEP 1: Open the AWS website

- Open Google Chrome.
- Visit AWS Free Tier.
- Click Create free account.

STEP 2: Enter account details

- Enter your email address.
- Enter an AWS account name.
- Click Continue.

STEP 3: Verify your email

- AWS sends a verification code to your registered email.
- Enter the code and continue.

STEP 4: Create a password

- Create a strong password.
- Confirm the password.

STEP 5: Enter contact information

- Select Personal account.
- Enter your full name, phone number, and address.
- Accept the AWS Customer Agreement.

STEP 6: Complete payment verification

- Provide payment details if requested by AWS.
- Verify the billing information.
- AWS may temporarily authorize a small amount to verify the payment method.

STEP 7: Verify your identity

- Complete phone verification using the OTP sent by AWS.
- Enter the verification code and continue.

STEP 8: Select a support plan

- Choose the Basic Support plan if presented during the registration process.

STEP 9: Complete registration

- Review the entered details.
- Submit the registration form.
- Wait for AWS to activate the account.

STEP 10 : Access AWS Management Console

- Visit AWS Management Console.
- Sign in using the root user email and password.
- After successful login, the AWS Console homepage will appear.

STEP 11: Secure the account

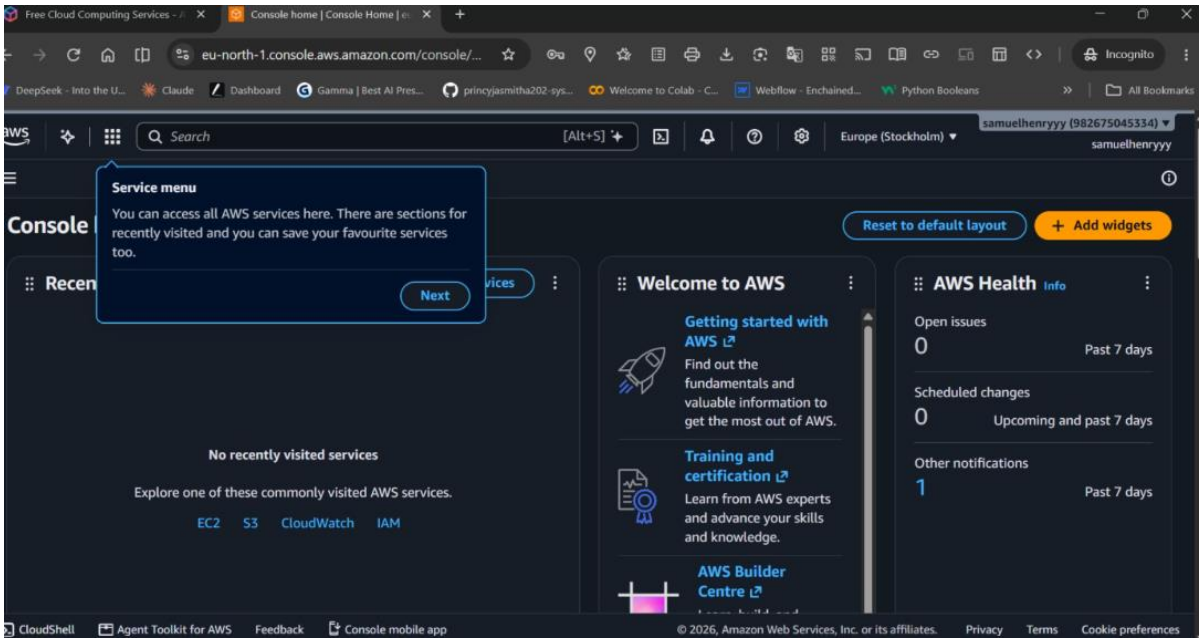

- Enable Multi-Factor Authentication (MFA).
- Create an IAM user.
- Attach the required permissions.
- Verify that the user can access the AWS Console.

.

Result

The AWS account was successfully created and activated. The AWS Management Console was accessed, allowing the user to explore AWS services and provision cloud resources. The account was secured by enabling Multi-Factor Authentication (MFA), creating an IAM user, and assigning the required permissions.
